

TELEHEALTH SERVICES

We're here to care...now virtually wherever and whenever our patients need us.

Today healthcare providers are rapidly adopting telehealth solutions that allow clinicians to connect with patients more easily - no matter where they are. Telemedicine solutions and mobile health tools can improve both access and patient outcomes simply by using audio/video and mobile technologies that are now ubiquitous in everyday life. Telehealth can improve patient access to addiction recovery therapies, simplify appointment scheduling and improve accountability.

Now our patients can begin their journey to recovery using a smartphone or laptop to access care – whether at home, at work or wherever they are.

Enterhealth's clinical team is trained to use the latest technology tools to provide most of our addiction treatment and recovery services electronically.

Our psychiatrists, psychologists, doctors and licensed professional counselors use a simple, fully encrypted, HIPAA-compliant platform to expand our patients' access to care. Connecting is easy and convenient. In just a

few clicks the provider and patient are joined to their virtual session. Both participants can see and speak to each other and know that their conversation is confidential and secure. Clients' families can also take advantage of teleservices for improved family group participation and progress.

Enterhealth provides the following telehealth services:

- Emergency individual support
- Initial patient assessments
- Psychiatry one on one sessions
- Therapy one on one sessions
- Family therapy sessions
- Medication management
- Diagnostic assessments

IF YOU OR SOMEONE YOU KNOW NEEDS
HELP WITH DRUG OR ALCOHOL ADDICTION,
PLEASE CALL ENTERHEALTH TODAY.

TELEHEALTH SERVICES

All telehealth services are delivered at the discretion of Enterhealth clinical staff.

We're connecting patients and clinicians virtually every day – helping to keep patients' progress on track while improving access and outcomes to increase

the chances for successful long-term recovery. Enterhealth Telehealth Services is dedicated to providing the same outstanding quality of care we have always delivered.

Please speak to your physician, therapist or the front office to schedule a session.

About Enterhealth

Our medically based program, created by a hand-picked team of addiction experts, is based on the latest National Institutes of Health research. Our full-time addiction-trained physicians, psychiatrists, nurses and therapists deliver a personalized treatment plan for each patient, an approach proven to be at least three times more effective than traditional programs.
